

# FLUMEN 3.0 14W CORTEN 5° 4000K 24V HC 1,5M

Cod: FLM04FCS1CTC00

#### IdroSkud® protection system

- polarity reversal protection
- voltage spikes protection
- idroSkud water infiltration protection

#### Protection class III

Designed to be supplied from a separated extra-low voltage (SELV) power supply

Protected against powerful power jets, 100 liters per minute

date: 13/09/2025

#### IP 67

Protected against immersion (30 minutes) up to 1 meter

Protected against impact of 20 J

### High temperatures

Design to withstand temperatures up to +50° C

# C5 - Very high

corrosion resistance level ISO 9223

### Mizar warranty

5 vears warranty

# Technical description

Floodlight suitable for outdoor environments (IP66/IP67), with operating temperature range: -20°C / +50°C. To reduce weight and ensure corrosion resistance, the body is made of aluminum. The aluminumbody is protected by polyester epoxy paint to ensure corrosion resistance of 1500 hours in salt spray. The light source consists of a single power LED chip, from 7W up to 14W, powered at 24V constant voltage with integrated driver. The high luminous flux makes it ideal for marking pedestrian and or illuminating facades and architectural details thanks to the optics with TIR lens. The LED source is recessed for greater visual comfort. Color rendering index CRI > 90. Flumen is equipped with IdroSkud® system to protect electronic components from voltage spikes, polarity reversal and water infiltration. There are optionals for anti-glare (honeycomb) and accessory for installation in the ground (stake). The product must be combined with a power supply to ensure its operation. The power supply must be ordered separately. The amount of luminaires that can be connected to a single power supply varies depending on the type of installation. It is up to the installer to verify the possible voltage drop by evaluating the distance between the product and the power supply.
